Subpart A—Cottonseed Chemists—Licensing Regulations

SCOPE

§96.1 General.

Licenses are issued to chemists of laboratories involved in the grading of cottonseed. A chemist that has passed examinations for analyst proficiency and for official standards used for grading shall be issued a license to perform quality analyses for grade determinations of cottonseed.

DEFINITIONS

§ 96.2 Terms defined.

Words used in the regulations in this subpart in the singular form will import the plural, and vice versa, as the case may demand. As used throughout the regulations in this subpart, unless the context requires otherwise, the following terms will be construed to

Blind check sample. A sample designated to check the routine analytical testing performance of the licensed USDA cottonseed chemist. The cottonseed is originally mixed in bulk quantities at a Division laboratory and packaged so that it is a representative portion for the samples forwarded to all chemists in a region under a certain number code. An oil mill representative and official cottonseed sampler repackage and identify the cottonseed as an official sample so that it would be blind or unknown as a check sample to the analyst.

Commercial laboratory. A chemical laboratory operated by an individual, firm, or corporation in which one or more persons are engaged in the chemical analysis of materials for the public.

Cotton gin. The machine or device used to separate the cotton fiber from the cottonseed.

Cottonseed. The word "cottonseed" as used in this part means the seed, after having been put through the usual and customary process known as cotton ginning, of any cotton produced within the continental United States.

Dispute. A disagreement between parties as to the true grade of a sample of cottonseed analyzed and graded by a licensed chemist.

License. A license issued under the Act by the Secretary.

Licensed cottonseed chemist. A person licensed under the Act by the Secretary to make quantitative and qualitative chemical analyses of official samples of cottonseed, according to the methods prescribed by the Director of the Division, and to certify the grade according to the official cottonseed standards of the United States.

Licensed cottonseed sampler. A person licensed by the Secretary to draw and to certify the authenticity of samples of cottonseed in accordance with the regulations in this subpart.

Lot. That parcel or quantity of cottonseed, offered for sale or tendered for delivery, or delivered on a sale or contract of sale, in freight cars, trucks, wagons, or otherwise in the quantities and within the time limits, prescribed from time to time by the Director of the AMS Cotton Division, for the drawing and preparation of official samples by licensed cottonseed samplers.

Official cottonseed standards. The official standards of the United States for the grading, sampling, and analyzing of

§ 96.3

cottonseed sold or offered for sale for crushing purposes, established May 23, 1932, and amendments thereto.

Official sample. A specimen of not less than 2 pounds of cottonseed, drawn and prepared by a licensed cottonseed sampler and certified as representative of a certain identified lot, in accordance with the regulations in this subpart.

Owner. A person who through financial interest owns or controls, or has the disposition of either cottonseed or of samples of cottonseed.

Society. The American Oil Chemists' Society (AOCS), P.O. Box 3489, 1608 Broadmoor Drive, Champaign, IL 61826–3489

Supervisor of cottonseed chemists. An officer of the Science and Technology Division designated as such by the Director

LICENSED COTTONSEED CHEMISTS

§ 96.3 Application for license as cottonseed chemist; form.

- (a) Application for a license to analyze and grade cottonseed shall be made to the Director on a form furnished for the purpose by the Science and Technology Division.
- (b) Each application shall be in English, shall be signed by the applicant, and shall contain or be accompanied by satisfactory evidence:
- (1) That the applicant is at least 25 years of age and that the applicant is an actual resident of the continental United States:
- (2) That the applicant holds a degree in chemistry or chemical engineering from a recognized college or university, and has had not less than 3 years practical experience in laboratory work, in which the applicant shall have analyzed quantitatively and qualitatively samples of cottonseed; or in the absence of a degree from a recognized college or university, that the applicant has had at least 5 years practical laboratory experience, 3 years of which shall have been devoted chiefly to the analysis of samples of cotton-seed:
- (3) That the applicant has no financial interest, or is in the employ of anyone having a financial interest in

any cottonseed oil mill or cotton ginning establishment;

- (4) That the applicant agrees to comply with and abide by the terms of the Act and these regulations so far as they may relate to him or her;
- (5) That the applicant is an independent analytical chemist or an employee of a commercial analytical laboratory; and
- (6) That the applicant owns or will have the use of all of the apparatus specified in the regulations, established hereunder for the analysis and grading of cottonseed.
- (c) Every chemist licensed hereunder to analyze cottonseed and to certify the grade thereof shall comply with the Society's official analytical test methods and other methods of analysis approved by the Director.
- (d) The applicant shall furnish such additional information, as the Director shall at any time find to be necessary, to the consideration of the submitted application.
- (e) Upon receipt of an incomplete or improperly executed application, the applicant will be notified of the deficiency in the application. If the application is not corrected and returned within 30 days following the date of notification, the application will be considered as having been abandoned.

§ 96.4 Examination of applicant.

Each applicant for a license as a chemist and each licensed chemist shall, when requested, submit to a practical examination and written test, to show an ability to analyze and grade cottonseed. These examinations can only be administered by the supervisor of cottonseed chemists. The chemist's failure to pass such tests may be considered sufficient ground for withholding the issuance of a license or of a renewal of a license.

§ 96.5 Period of license; renewals.

The period for which a license may be issued shall be from the first day of August, until, and including the 31st day of July, following. Renewals shall be for not more than 1 year beginning with the first day of August of each year, provided that licenses issued on
